BARBARA SUMMONS PRIMARY EXAMINER

Continuation Sheet (PTOL-303) 10/073,895

Application No.

Continuation of 2. NOTE: The newly added feature in claim 19 that "only the width of adjacent electrode fingers of an input IDT and an output IDT is designed to be smaller..." (see the last two lines of the claim) requires further search and/or consideration. That is, eventhough the art of record shows more than one adjacent finger with a smaller width, a further search and consideration is required to verify the existence or nonexistence of art with "only" one adjacent finger of a smaller width, or to determine whether such would be an obvious modification.
